Introduction	9
Global greenhouse gas emissions Mattias Lundblad	25
The UN's climate panel, the IPCC	35
THE PHYSICAL SCIENCE BASIS	
The Earth's climate according to the IPCC Erland Källén	41
More about the climate system Erland Källén	59
Measurements and models – tools for the climate researcher Markku Rummukainen	71
Why should we believe in climate models? Michael Tjernström	83
In the light of climate history – researchers should take the initiative in the debate Per Holmlund	97
The sunspot picture of the sun is outmoded Henrik Lundstedt	111
Extend the climate measures to soot particles! Örjan Gustafsson	125

**Uncritical data mining behind criticism
of the IPCC** 139

Eigil Kaas

Who can we trust? 157

Olle Häggström

**This is why we should believe in
climate change** 171

Sverker Sörlin

IMPACTS, ADAPTATION AND VULNERABILITY

**When does man's impact on the climate
become dangerous?** 191

Markku Rummukainen

**Imbalance in ecosystems can accelerate
climate change** 203

Benjamin Smith

World of Warcraft and ecological crises 219

Victor Galaz

**Coral reefs may disappear as oceans
turn more acid** 233

Keith Brander

Health risks in a warmer climate 245

Bertil Forsberg and Anna-Karin Hurtig

Managing water to meet both food and bioenergy demands 259

Göran Berndes, Louise Karlberg and Jan Lundqvist

Biofuels with multiple benefits – the case of Jatropha in Zambia 279

Francis X. Johnson and Thomson Sinkala

Attractive coasts are vulnerable to climate impacts 291

Richard J.T. Klein and Annika E. Nilsson

Put the climate right – for the sake of safety 303

Peter Haldén

MITIGATION OF CLIMATE CHANGE

Climate measures in an uncertain world 317

Daniel J.A. Johansson

Easier to meet the two-degree target in an electric society 333

Sven Kullander

Storing carbon dioxide – solution or smokescreen? 355

Anders Hansson and Mårten Lind

Carbon dioxide storage – an essential element in tackling global climate change 371

Filip Johnsson

Global climate ethics – what is at stake? 383

David Olsson Kronlid

Rio, Kyoto, Bali, Copenhagen – climate collaboration in the melting pot	395
Björn-Ola Linnér and Bo Kjellén	
We need a global price on carbon	415
Lars Zetterberg	
The EU's climate and energy policy – from rhetoric to practice	429
Karin Bäckstrand	
The EU's renewable energy dilemma	443
Maria Osbeck and Neil Powell	
Causes of climate change – what does social science say?	457
Johan Hedrén	
Is the threat to the climate an opportunity for companies?	471
Pontus Cerin and Tommy Lundgren	
Climate and business climate – collision between two worlds	489
Johan Sandström
