

# CITTÀ DI VENEZIA'S PARTNERS

All of the activities on display are made possible by the priceless assistance of the following institutes

CORILA Consorzio Ricerche Laguna.

The Consortium for Coordination of Research Activities Concerning the Venice Lagoon System is an association of Ca' Foscari University and the University IUAV of Venice, the University of Padua, the Italy's National Research Council and the National Institute of Oceanography and Experimental Geophysics. It is overseen by the Ministry of Education, University and Research.

It is the partner organization of the Municipality of Venice for the activities related to the "Making Cities Resilient" campaign.

**Insula**

Insula spa braccio operativo del Comune di Venezia per la manutenzione urbana, le infrastrutture e l'edilizia

Since 1997 Insula spa is the operative arm of the City of Venice which is the enabling subject for all the maintenance projects in its historic centre (financed by the national and regional governments). After 2008 the society acquires the task of minor building recovery once accomplished by Edilvenezia.

Insula programs, projects, awards contracts and follows the execution of urban and buildings works in Venice.

Agenzia Regionale per la Prevenzione e Protezione Ambientale del Veneto

Is the Agency for the environmental prevention and protection of the Veneto region.

It depends from the Regional Council, acting with administrative, technical and management autonomy. With its meteorological center site in Teolo is responsible to provide the Venetian area institution with weather forecast data.

[www.arpa.veneto.it](http://www.arpa.veneto.it)

It is the environmental services company owned by 42 Municipality of the Venetian area; among other things, it manages for Venezia the waste and the water cycle and the posing of the foot-bridge in case of acqua alta.

It has been partner in the construction of the anti-fire system and it's developing the Ecodistretto of Marghera: a project for recovering materials from the waste that represent one of the first "green economy" activities for the recovery of the industrial area.

[www.gruppovertas.it](http://www.gruppovertas.it)

Special Commissioner appointed by the President of the Council of Ministers with the task to restore the safety conditions in the areas affected by the flooding occurred in the Venetian area during the 26th of September 2007.

The Commissioner identified almost 400 interventions and has also issued some ordinances for the building activity.

Since the end of its term, scheduled for the end of the 2012, all initiatives will be transferred to the competent institutions among which the City of Venice.

[www.commissarioallagamenti.veneto.it](http://www.commissarioallagamenti.veneto.it)

It is the "Venetian Energy Agency" and it's the technical bureau specialized in the implementation of energy policies in the local area.

It's owned by the City of Venezia and Veritas spa and its task is to promote, on a local scale, the rational use of energy, the use of renewable sources and reducing emissions of greenhouse gases.
