

## Consultation process Post HFA-Online Survey National Governments

### Survey Results: Identified Trends

26 Nov. 2012

*¿What are the three major challenges (or obstacles) for disaster risk reduction? What are the underlying factors that contributed to the challenges identified?*

Information availability, standardized data, including risk scenarios	
Weak governance and lack of legal framework/political interest because of ignorance	
Inadequate budget	
Poor territorial planning that does not incorporate DRR	
Insufficient training	

**Plataforma Regional para la Reducción del Riesgo de Desastres en Las Américas**  
 Invirtiendo para la Resiliencia - III Sesión - Santiago de Chile, 26 al 28 de noviembre 2012

¿What are the top three significant elements for disaster risk reduction that should be addressed in the post-2015 Framework for Disaster Risk reduction?

Urban risk-Community level	
Knowledge of the risk/territory information/early warning systems	
Inclusion of minorities / deepen the social vulnerability theme	
Formulation/approval of national DRR policies/strategies/plans	
More resources for DRR	
Decision-makers awareness	
Media communication/private sector	
Capacity building at governing institutions and sectors level(education, etc.)	
Exchange of successful experiences	
Mandatory use of sensitive risk land planning	

What are the advances in local government in disaster risk reduction integration with adaptation to climate change? How has this integration has been achieved?

**Plataforma Regional para la Reducción del Riesgo de Desastres en Las Américas**  
 Invirtiendo para la Resiliencia - III Sesión - Santiago de Chile, 26 al 28 de noviembre 2012

*How would you incorporate more accountability in disaster risk reduction?*

Mechanisms that allow transferring risk and moral and economic punishment to those who generate it	
DRR plan with clear indicators and responsibilities allocation	
Institutional framework appropriate for DRR in ministries	
Increasing sensitization and public awareness	

**Plataforma Regional para la Reducción del Riesgo de Desastres en Las Américas**  
 Invertiendo para la Resiliencia - III Sesión - Santiago de Chile, 26 al 28 de noviembre 2012

*Emphasis has been placed on the integration or mainstreaming of disaster risk reduction into development planning and sectors; has this been successful? Can you provide examples?*

Yes, but lacking	
No	
Examples :	
- Ministries of Environment, Communications, Finance	
- Programme budget by results	
- Municipal plans	

**Plataforma Regional para la Reducción del Riesgo de Desastres en Las Américas**  
 Invertiendo para la Resiliencia - III Sesión - Santiago de Chile, 26 al 28 de noviembre 2012

*¿What is the national governance structure of disaster risk reduction? What are the key elements of risk reduction governance? What elements are missing?*

Law on disaster risk reduction	
Articulation of urban and rural development councils	
Budget allocation	
Capacities development at the local level	
Strategic alliances establishment	
Increased presence of the scientific sector	

*¿What progress has the government made in linking disaster risk reduction with climate change adaptation at the local level, in which way this integration has been made ?*

Guidelines and manuals for the incorporation of the DRR and ACC in planning processes	
Participation of Ministries of Environment on national platforms	
Establishment of environmental and territorial observatories	
ACC National policy as a cross-cutting theme in strategic and operational plans	
DRR actors involvement in climate change Committee	

**To what extent risk assessment is considered in the urban planning process in your country ?**

Efforts are currently under way	
Physical vulnerability maps used in Territorial Planning (TP) and urban development plans	
Ecological-economic zoning plans used in (TP) and urban development	

**Plataforma Regional para la Reducción del Riesgo de Desastres en Las Américas**  
Invirtiendo para la Resiliencia - III Sesión - Santiago de Chile, 26 al 28 de noviembre 2012

¿What has been done in making schools and hospitals resilient to disasters in your country? How were the actions carried out?

Security plans and evacuation drills	
Teachers and students training	
Planning, design and construction of safe schools technical guidelines	
Prioritization in the program budget for results	

**Plataforma Regional para la Reducción del Riesgo de Desastres en Las Américas**  
Invirtiendo para la Resiliencia - III Sesión - Santiago de Chile, 26 al 28 de noviembre 2012

*In your opinion, does the post2015 framework need to be legally binding?*

Yes

**Plataforma Regional para la Reducción del Riesgo de Desastres en Las Américas**  
Invirtiendo para la Resiliencia - III Sesión - Santiago de Chile, 26 al 28 de noviembre 2012

*How does the post2015 development agenda (post MDGs) and proposed sustainable development goals relate to disaster risk reduction?*

Social vulnerability concept	
Poverty reduction	
Community participation	
Environmental management	
Food security
