

UNFCCC 19th Conference of the Parties (COP), Warsaw, Poland, 11-22 November 2013.

*“COP19 affords an opportunity to consolidate responses to climate change and to showcase the many ambitious **adaptation** and mitigation initiatives being implemented around the world. By scaling and speeding up action we prepare for a universal global agreement and move toward a safer future.”*

Christiana Figueres, Executive Secretary UNFCCC

COP19 brings more than ever a focus on climate change adaptation measures and represents therefore an important “momentum” to assure that attention at the global level is paid to the link between CCA and DRR.

CCA and DRR at COP 19

- UNISDR supports the organization of two side events during COP 19, which will contribute to stress the role of DRR in CCA strategies:
 - Building resilience and reducing risk in a changing climate (12 November 2013 – date tbc)
 - Build resilience and reduce climate risks to support NAPs with focus on Food Security, Health and DRR
