
- Prevention of Natural Disasters
- Flexibell

Requires each country to:

- National and local risks assessment
- Early warning
- HFA Focal Point
- National platform by 2015
- Allocate resources and modify legislation
- Disaster preparedness and contingency plans
- Information, exchange and public awareness
- National reporting biannual
Scope

The scope of this Framework for Action encompasses disasters caused by hazards of natural origin and related environmental and technological hazards and risks.

It thus reflects a holistic and multi hazard approach to disaster risk management and the relationship, between them which can have a significant impact on social, economic, cultural and environmental systems, as stressed in the Yokohama Strategy.
Post 2015 framework for disaster risk reduction – Pre zero draft
Section D – priorities for action

1. Is there something missing? Should Focal point be mentioned?
2. Disposition – understanding risks, Governance, preparedness & recovery, investments – Is it clear enough?
3. Should and could the need for national platforms, their obligations and the support to NP be strengthen?
4. In 14 d, and 15 e NP is mentioned. Almost NP obligations in other paragraphs?
