Role of CSOs and the Post-2015 Framework
Global Network for Disaster Reduction

- 650 members: Civil Society Organisations,
- Majority national and sub-national
- 120 countries across all regions
85,000 ideas to strengthen community resilience
Joint Civil Society Recommendations

Summary of Civil Society Recommendations, Principles and Political Commitments for Incorporation within a Post-2015 DRR Framework

<table>
<thead>
<tr>
<th>1. STRATEGIC EMPHASIS ON TACKLING CAUSES OF RISK</th>
<th>2. STRENGTHEN POLICY COHERENCE</th>
<th>3. IMPROVE ACCOUNTABILITY AND TRANSPARENCY</th>
<th>4. INCREASED FOCUS ON “EVERYDAY DISASTERS”</th>
<th>5. STRENGTHEN LOCAL GOVERNANCE CAPACITIES</th>
</tr>
</thead>
</table>

Guiding Principles:

<table>
<thead>
<tr>
<th>EQUITY</th>
<th>RIGHTS-BASED</th>
<th>PEOPLE-CENTRED</th>
<th>ENVIRONMENTAL INTEGRITY</th>
</tr>
</thead>
</table>

Political Commitments:

| FOR THE SAFETY AND PROTECTION OF PEOPLE FROM DISASTERS | TO MULTI-STAKEHOLDER COLLABORATION | TO THE EMPOWERMENT OF COMMUNITIES AND LOCAL STAKEHOLDERS |

GNDR action to support HFA2: ‘Frontline’

Local Resilience Profiling:
- Threats
- Impacts
- Actions
- Barriers

**Local** action and learning to strengthen community resilience

Combine data at **national** level to inform strategic implementation

Combine data to **global** level to provide resilience baselines and monitoring for HFA2 and also sustainable development and Climate Change Adaptation
Frontline Resilience Dashboard
Scale: National
Country: Peru
Date: 2014

Threats and Causes:

Summary
Threats of political origin have the greatest impact, followed by social factors. The dominant causes are also identified as concerned with politics and power.

Analysis
The specific threats most commonly identified are environmental. The greatest impact is perceived to result from crime.

Capacities
Community capacity to participate and to learn is relatively high. Response capacity, communications, engagement with private sector and education rank low.

Briefing: Political and social factors play a large part in determining community resilience in Peru. Crime and violence are commonly cited as threats. Capacity to engage at community level is significant but resource-based aspects such as preparedness and response, communications, private partnerships, and education are more limited.
Frontline development

- Pilot conducted in 9 countries in Latin America: 6000 respondents
- Further work in Central America and Africa 2014
- Invitation for participants in Asia Pacific region
- Programme and initial results presented at WCDRR
- Frontline resources available to participating countries
- Programme to be conducted at scale: 80+ countries
Specific recommendations from Arab Region

- The political situation and instability are still major problems in the regions.
- The influx of Syrians refuges continues putting more stress on our limited resource.
- Strengthening to birth control programmes as the continuous population growth that has made the problem of solid waste one of the problems that causes the occurrence of many of the risks.
AFL in Arab Countries

- Pilot Processes are currently executed in 3 countries in Arab states
- Selection of 3 scattered cities as hot spots that are exposed to many risks.
- Personal meetings with community leaders and governmental officials to monitor and identify the needs of the community.
- Field visits to various hot spots.
- Dialogue with all parties involved stakeholders to monitor risks and their impact on the environment and society.
El-Khosoos - Egypt
Frontline Objectives

1. Conduct resilience profiling as a basis for action and learning at local level

2. To generate information to inform and improve integrated risk management and learning at local, national, regional and global level

3. To generate baseline data for measuring progress (or setbacks) towards strengthening the resilience of nations and communities to disasters within participating communities and countries

4. To increase collaboration and linkages between different post-2015 framework (climate / DRR / SDG)
