Sharm El Sheikh, 14 September 2014

---

# Input level : Integrated Disaster risk management policies

# Input Indicators - Risk Governance

## Examples

- **Budget:** Does the country have a dedicated budget line for disaster risk management that can be accessed by sectors and local governments for all aspects of DRM including risk avoidance, reducing existing risks and strengthening resilience? (Y/N) If yes, what % of total budget is allocated? What percentage of this allocation is used for response and recovery?

# Input Indicators - Risk Knowledge

## Examples

- **Disaster Loss Database:** Does the country have a policy formally requiring local, sub-national and the national government to systematically record all disaster loss and damage? (Y/N) if yes, is the database disaggregated to the local level? (Y/N) Is it based on an international standard? (Y/N)? If so which?

# Input Indicators – Reducing Risk

## Examples

- **School safety:** Does the country assess the disaster risk of public schools? If yes, % of public schools assessed, and % retrofitted

# Input Indicators – Avoiding Risk

## Examples

- **Safe health facilities:** Does the country have legislation or policy in place that requires disaster risk to be taken into account in the design and siting of health facilities (Y/N) What % of new health facilities have factored disaster risk into their design or siting ?

# Input Indicators – Strengthening Resilience

## Examples

- **Contingency fund:** Does the country have a contingency fund or % of the budget set aside for emergency? (Y/N) if yes, % of annual budget which is set aside or accumulated in the contingency fund

# Thank you very much!
