Jeju, 25 July 2014

[UNITAR CIFAL Jeju]
Call for applications for “Developing Capacities on Climate Change Adaptation (CCA) and Disaster Risk Reduction (DRR) in the Asia-Pacific Region” on 20-23 October 2014

To whom it may concern,

Greeting from Jeju Island!

May I have the pleasure of introducing our organization, Jeju International Training Center (JITC)?
JITC is also called CIFAL Jeju, meaning that it is part of CIFAL Network (International Training Center for Local Authorities) of UNITAR, a training arm of the UN system.

The Center has been established to provide workshops/seminars to help local governments’ capacity-building, especially in the area of ‘human security and safety’ and ‘sustainable urbanization and environment’ in cooperation with UNITAR.

Our sixth workshop for 2014 – on human security – is to be held from October 20-23, 2014 in Jeju, Republic of Korea with the title “Developing Capacities on Climate Change Adaptation (CCA) and Disaster Risk Reduction (DRR) in the Asia-Pacific Region”. This workshop aims at developing capacities of local actors while enabling cities to build resilience by integrating disaster risk principles into local plans and initiatives.

We would appreciate it if you would disseminate the program of our workshop in your organization and so that the interested could participate.

Please find attached the workshop programme agenda (tentative) and the application form for the event.
We very much look forward to your organization's participation.

Kindly note that the application deadline is 31 August (Sun) 2014 and late submission is not accepted.

If you need any further information, please let me know.

Thank you for your kind attention and assistance.

Best regards,
CIFAL Jeju / JITC

Enclosure: 1) Workshop Programme Agenda (tentative), 2) Application Form
