

SIGNALERT APP

NEW V2 RELEASED

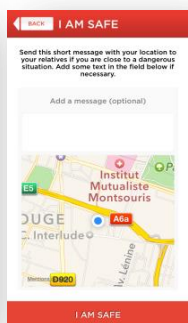

YOUR SMARTPHONE APP TO REPORT, BE READY AND REACT IN DISASTERS, CLIMATE CHANGE AND CRISIS SITUATIONS

IMPROVED FREE VERSION

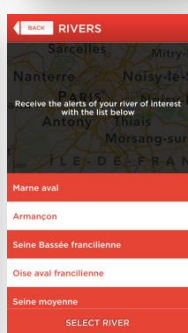

- Several bugs fixed.
- Possibility of reporting new phenomena : cyclone/typhoon/hurricane
- New advices on what to do during a cyclone (and more to come on other types of disasters)
- Better interaction with social networks (share your alerts on Twitter and Facebook)
- Connection to a network of identified users via a code.

PAID VERSION : YOUR PERSONAL ALERT AND SURVEILLANCE TOOL OF REMOTE OR NEIGHBOR PLACES

- Your own emergency numbers stored on the App for fast sending of messages
- An emergency "I am Safe" button that sends an SMS to reassure your family and friends if you are caught in the middle of a dangerous situation, and locates you.
- Permanent monitoring of your places of interest: receive real time alerts about your chosen places of interest, as sent in by other users of the app in a radius of several kilometers.
- Real time push notifications about changes in flood warning levels on rivers that could affect you, near your places of interest (currently available in France and soon to be available elsewhere).
- The possibility of contacting other users nearby who sent alerts, and who have given their consent to be contacted, to facilitate mutual support and quick assessment of the situation.
- Yearly subscription available through the free App for € 2.

Coming soon: a Spanish version and several other types of phenomenon, able to be reported from anywhere in the world.
