WHAT RESULTS FOR COP21?

Véronique Massenet - Damien Navizet – COP21
The Paris Climate Alliance

Our goals for the conference

• Define a framework of action to keep global warming below 1.5 or 2°C, and to allow countries to adapt and embark on a low emissions, sustainable development path.

• Build an « Alliance » to this end including:

  - A universal and legally binding agreement
  - Ambitious national contributions
  - A credible financial outcome
  - A solutions agenda
Everything converges towards the COP

- Solutions Agenda
  - Business and Climate Summit (Paris)
  - World Summit of Local Governments (Lyon)
  - Pre-COP (August)
  - Consultations (February - June - August - October)

- First Quarter of 2015: National Contributions
- COP21: Post 2015, Cool Earth Forum (Japan)
- Finance: G7, Addis Ababa, IMF-WB, G20, Climate Finance Day, World Summit of Local Governments (Lyon)
- COP21: G20, IMF-WB, Addis Ababa, G7, Cool Earth Forum (Japan)

- Synthesis report by the UNFCCC: November
A universal and legally binding agreement

Universal  Ambitious  Durable et dynamic

Flexible  Balanced  Significant
Some of the core issues at stake

• The **Legal form of the agreement**, and that of the national contributions

• The **differentiation of** efforts by the Parties

• The way in which the agreement will achieve its objectives over time, and the **cycles** of national contributions, the reporting and verification...

• The importance given to **adaptation**

• The **support** to developing countries
The national contributions

As of October 5th

Source: World Resource Institute

148 countries

~ 90% of World emissions
The financial outcome

*Three components*

- The mobilisation by developed countries of $100 billion per year by 2020
- The methods of accounting for climate finance
- The reorientation of all financial flows
The Lima Paris Action Agenda at the COP

• **A High-Level Meeting on Climate Action = Action Day** *(Plenary room in the Blue Zone)*
  - On **Saturday, December 5th**, in the **blue zone in one of the plenaries**
  - **High-level participation with key leaders.**
  - It should shed a light on the leaders of the future world that is emerging

• **A serie of LPAA thematic Focuses** *(in the Blue Zone)* that:
  - will reflect the major commitments by action area
  - should reflect the magnitude of the mobilisation and action
  - provide a clear narrative (from science to action)
  - will include the mobilisation of the private sector as well as the cities and subnationals.

4034

Register your individual commitments

Newly added

Metsä Board
Finland
Reduce operational CO2e emissions intensity by 30% per tonne of product from 2009 to 2020 through increased energy efficiency and renewable energy sources.

Amazones
Brazil
Reduce emissions by 80 to 95%, or link to 2 metric tons CO2e per capita, by 2050.

Miso K M Karibinna Charitable Trust
United Kingdom of Great Britain and Northern Ireland
Up to $10m USD invested in wind farms in Europe

Skandinaviska Enskilda Banken AB (SEB AB)
Sweden
Reduce CO2e emissions from purchased utilities by 70% from 2000 to 2015 through increased energy efficiency and renewable energy sources.
