Testing the Drafted New Set of Local Urban Indicators in the City of Aqaba

Feed Back and Out puts of the Aqaba workshop
Presented By Eng. Khaled R Abuaisheh
Urban Resilience Expert Meeting
Beirut, Lebanon
March 14-17 2016
The City of Aqaba

- Located at the northern tip of the Gulf of Aqaba
- Jordan’s only outlet and sea port to the open sea
- In 2001 the city was transferred into a Special Economic Zone namely after (ASEZ)
THE VISION
The Aqaba Special Economic Zone is a world class Red Sea business hub and leisure destination enhancing the quality of life and prosperity of the region and a driving force for the economic growth of Jordan.”

The Mission
➢ To improve the quality of life for all community members
➢ To create, regulate and sustain a globally competitive investor friendly environment
➢ To optimize the efficient utilization of entrusted resources in harmony with the Master Plan to internationally recognized practices
➢ To effect a transparent and accountable corporate structure, governance and culture that synergizes the activities of the ASEZA team.

VALUES
ASEZA values its staff, citizens, investors and environment
Hazards profile

Earthquakes

Flashfloods

Sandstorms

Technological hazards
Why DRR in the city of Aqaba?

- Protecting investments
- Minimizing losses and damages from Hazards
- Building local capacity
- Build back better during recovery
The Aqaba Workshop

The aim of the workshop was to test the new drafted set of local urban indicators and address the gaps to make the City of Aqaba more resilient to disasters, also to investigate the clarity, relevance and usability of such indicators at the local level among the key stakeholders from the city of Aqaba.

It was a unique opportunity for the participants in challenging their city’s capacity in DRR, as well as a tool for UNISDER and its partner ASEZA to set the way forward in the best and most suitable Urban indicators for the Arab States, since a few local governments around the world are testing and applying these indicators as of December 2015.
The proposed new Ten Essentials

- Organize for disaster resilience.
- Identify, understand and use current and future risk scenarios
- Strengthen financial capacity for resilience
- Pursue resilient urban development and design
- Safeguard natural buffers to enhance the protective functions offered by natural ecosystems
- Strengthen institutional capacity for resilience
- Understand and strengthen societal capacity for resilience
- Increase infrastructure resilience
- Ensure effective disaster response
- Expedite recovery and build back better
The Consultation and Testing Methodology:

Testing the local urban indicators for essentials 1-5 on the city of Aqaba with an aim to measure its Characteristics and elements of resilience that enable it to withstand or recover based on the local urban indicators (layer 1 and 2)

Figure 1: Ten essential indicators - Framework
the Proposed architecture
At the opening session:
- Objectives, expected outcomes and participants’ Introduction
- Introduction to HFA -> Sendai Framework and the Making Cities Resilient campaign
- Review of current DRR monitoring in the city of Aqaba - what indicators, data and collection mechanisms are already available
- Experience of using LG-SAT (The Aqaba report Disaster Risk Reduction)

Then:
- Presentation on Jordan DRR Profile with focus on Aqaba Hazard profile
Participants were asked to follow the matrix below to indicate each essential indicator and sub-indicators, and range it from 1-5. And the average result were as follows:

<table>
<thead>
<tr>
<th>Essential-#</th>
<th>Clarity</th>
<th>Relevance</th>
<th>Use</th>
</tr>
</thead>
<tbody>
<tr>
<td>Essential-1</td>
<td>4</td>
<td>4</td>
<td>3</td>
</tr>
<tr>
<td>Essential-2</td>
<td>3</td>
<td>4</td>
<td>3</td>
</tr>
<tr>
<td>Essential-3</td>
<td>5</td>
<td>4</td>
<td>4</td>
</tr>
<tr>
<td>Essential-4</td>
<td>5</td>
<td>4</td>
<td>4</td>
</tr>
<tr>
<td>Essential-5</td>
<td>4</td>
<td>4</td>
<td>4</td>
</tr>
<tr>

<td>3</td>
<td>4</td>
</tr>
<tr>
<td>Essential-10</td>
<td>3</td>
<td>3</td>
<td>3</td>
</tr>
</tbody>
</table>
• In conclusion
  ➢ The testing process of the local urban indictors reveled that the City of Aqaba is on the right track when its DRM is tested against the ten Essential for Urban Resilience
  ➢ this mean that DRR is practiced at the local level and the tools and principals applied to a great extent
  ➢ However, measuring Urban Disaster Resilience as a full integrated inclusive system is still yet to be realized and more is Needed to achieve urban resiliency in terms of :-
  ➢ Vulnerability assessment, Diverse livelihoods and employment, Effective safeguards to human health and life, Comprehensive security and rule of law, Sustainable economy, Effective provision of critical services Etc. (City Resilience Framework)
