

ARISE Mission: To create risk-resilient societies by energising the private sector in collaboration with the public sector and other stakeholders to achieve the outcome and goal of the Sendai Framework in a transparent and inclusive way that delivers local and measurable impact.

Theme	Project Description
1. Disaster Risk Management Strategies	ARISE will build partnerships between public and private sectors to assess disaster risks and develop appropriate risk management strategies and plans.
2. Investor Metrics	ARISE will promote the development and integration of disaster risk and resilience metrics into the planning and evaluation of financial, investment and accounting decisions in both the public and private sector as well as drive the integration of disaster risk and resilience into the broader financial and accounting system.
3. Benchmarking & Standards	ARISE will support the development of new and amending of existing industry benchmarks and voluntary standards for disaster risk management in all industries including healthcare, schools, power generation and distribution, telecoms, construction, hotels and tourism.
4. Education & Training	ARISE will collaborate with leading universities, training institutions, professional associations, and educational outreach programs in all regions to introduce or improve disaster risk management into the curricula of education and training services.
5. Legal & Regulatory	ARISE aims to better integrate and recognize disaster risk and resilience in regulatory frameworks.
6. Urban Risk Reduction & Resilience	ARISE will support local business communities and governments to increase awareness of and understanding for improving disaster resilience in the urban and built environment, and will inter alia address critical infrastructure and basic service delivery, transportation, energy and utilities services, and information and communications technology.
7. Insurance	ARISE will expand collaboration with (re)insurance industry entities to: make use of their disaster risk reduction expertise, increase access to accessible and effective disaster insurance solutions in underserved markets; to develop risk transfer approaches that provide incentives for disaster risk sensitive private (and public) investment and to leverage the industry's capabilities in the development and sharing of risk information.
