

# International Disaster Risk Reduction Day

## Using Emerging Methods and Practices to Promote Disaster Resilience

9.30am – 1.30pm, 13<sup>th</sup> October 2017, HO43, Humanities

9am	<b>Registration</b>
9.30am	<b>Rethinking, risk, crisis and uncertainty: disaster resilience 2.0</b> Professor Jon Coaffee, Politics and International Studies
10am	<b>Crowdsourcing and Citizen Science: Emerging Data and Practices to Support Disaster Risk Reduction</b> Dr João Porto de Albuquerque, Centre for Interdisciplinary Methodologies
10.30am	<b>Break</b>
10.45am	<b>Tutorial - Using crowdsourcing mapping software for humanitarian purposes – How to map using JOSM</b>
11.30am	‘Mapathon’, Collaborative mapping event for disease outbreak in Kenya (lunch provided)

Come, join us to learn how to help to produce maps from satellite images to support humanitarian work and have a lot of fun (and free lunch too). Bring along your laptop and mouse for the Mapathon. Everybody is invited to stay after the completion of the event in an open discussion regarding a new Collaborative Mapping group, "Resilience 'Mapping Society" which is currently being launched.
