Integrated Monitoring Initiative Objectives

1. Develop **methodologies and tools** to monitor SDG 6 global indicators
2. Raise **awareness** at national and global levels about SDG 6 monitoring
3. Enhance **country capacity** in monitoring (technical and institutional)
4. Compile country data and **report** on global progress towards SDG 6

Process and timeline 2014-2018

Principles for integrated country monitoring systems

1. High-level political support
2. Linking and aligning with existing processes
3. Involving different stakeholders
 - ministries and institutions for water, sanitation, environment, meteorology and hydrology, food, agriculture, irrigation, health, energy, mines, production, planning, housing and finance
 - national statistical office
 - different levels of government, civil society, private sector, academic institutions, religious and cultural institutions
4. Focal points and intersectoral monitoring teams

Principles for integrated country monitoring systems

5. Monitoring driven by data use
6. Starting with existing data, progressive monitoring
7. Cross-sectoral analysis and use of data

SDG monitoring is a dynamic, learning and evolving process...

Call for disaggregated data

Where, when, on whom and how to focus resources

- Effective and efficient policy- and decision-making
- Ensure that no one is left behind (sex, age, disability, income)
- Cross-analysis of different datasets (interlinkages)
