

Break Out Session 4: Group No. 1

Identifying Partners to implement Capacity development for Disaster Risk Reduction

1. Are there additional stakeholder groups that should be included in this Strategy?

2. Are there any additional tasks?

1. National Government (including elected leaders, parliamentarians, and line ministries, **include armed forces**)
2. Local and Sub-national Government
3. Private Sector (**multinational, national and local – very different conversation**)
4. Nongovernmental and Civil-Society Organizations (NGOs and CSOs)
5. Academia
6. Individuals and Households
7. Regional Organizations including IGOs
8. The United Nations, International Organizations, and International Financial Institutions
9. **Sectors: Education (to also incl. primary and secondary schools, long term), Health (primary-tertiary), etc.**
10. **Use Stakeholder groups nomenclature: (incl. indigenous populations, Faith-based organizations, professional organizations, women organizations, media, social media, science and technology community – academia, private sector would also fall within the stakeholder groups) (Stakeholder mapping – Roles and incentives)**

Include stakeholder analysis important to understand not only their roles, but also capacities and needs.

Break Out Session 4: Group No. 2

Identifying Partners to implement Capacity development for Disaster Risk Reduction

- 1. Are there additional stakeholder groups that should be included in this Strategy?**
- 2. Are there any additional tasks?**

Additional Groups Suggested:

- Put Individual and Household category up-front, and tasks under this category are not duplicated in following categories (following category tasks are additional)
- Possible New Category or incorporated in another: Indigenous Peoples
- Possible New Category or incorporated in another: Media
- Possible New Categories: The Sectors should be listed separately (e.g. Health, Education etc).
- Expand Individual and Household Category to include: Immigrant and Refugee Populations
- Refer to “ECO Framework” 5 x Categories

Break Out Session 4: Group No. 2

Identifying Partners to implement Capacity development for Disaster Risk Reduction

- 1. Are there additional stakeholder groups that should be included in this Strategy?**
- 2. Are there any additional tasks?**

Tasks of Private Sector:

- Business Continuity Management expertise should be shared and businesses encouraged to adopt (Private sector should invest in their own resilience)
- Need for private sector in building Disaster Resilient Infrastructure
- Part C: specify information technology as a key tool to be used in driving innovation and social networking for emergency management messaging distribution
- Part B, D and K should be re-phrased or combined where possible and should encourage “partnerships”.
- Specify the role of SMEs and Micro-Enterprises, and where possible separate multi-nationals and SMEs in the task list.

Break Out Session 4: Group No. 3

Identifying Partners to implement Capacity development for Disaster Risk Reduction

- 1. Are there additional stakeholder groups that should be included in this Strategy?**
- 2. Are there any additional tasks?**

1. National Government (including elected leaders, parliamentarians, and line ministries)
2. Local and Sub-national Government
3. Private Sector(**include employer associations, banking**)
4. Nongovernmental and Civil-Society Organizations (NGOs and CSOs) (**include youth**)
5. Academia **and research Institutions**
6. Individuals and Households
7. Regional Organizations including IGOs
8. The United Nations, International Organizations, and International Financial Institutions
9. **Media**

Break Out Session 4: Group No. 3

Identifying Partners to implement Capacity development for Disaster Risk Reduction

NGOS and CSOs

1. Are there any additional tasks?

NGOS

Work with all member of the community and pay special attention to people with specific vulnerability (use Sendai Framework language to designate)

2. Media

Raising awareness, advocacy and motivation of society on DRR

Extend special programmes for Media staff

Strengthening linkages with other stakeholders to flow information

Introduce innovative products for risk information

Collecting, analyzing and sharing information

3. Academia and Research Institutions

Teaching on cultural heritage

All groups to provide information to media

Include a link to Academia

Break Out Session 4: Group No. 4

Identifying Partners to implement Capacity development for Disaster Risk Reduction

Are there additional stakeholder groups that should be included in this Strategy? ‘

1. Professional associations (Engineers, architects, urban planners)
2. Think tanks
3. Faith based groups
4. Technical and further education institutions
5. Business Schools
6. Red Cross National Society

Are there any additional tasks? – Academia and Individuals/ Households

Academia

- Support research on areas of Disaster Risk Reduction;
- Replace title ‘Academia’ with Education institutes.

Individuals & Households

- Should stay informed not only for alerts but also about new developments (life long learning). Case of Sweden – where citizens have the responsibility to learn and be prepared.

Break Out Session 4: Group No. 4

Identifying Partners to implement Capacity development for Disaster Risk Reduction

General feedback

- Task list looks very long and intimidating and can be consolidated.
- Who is going to ensure implementations of these proposed tasks?
- Particular to section 3 - The proposed actions are not structured around the 4 priority areas of SFDRR.
- There are lot of conflicting/ overlapping terminology in the draft strategy which needs to be sorted out, as a concrete way to streamline the document.

Break Out Session 4: Group No. 5

Identifying Partners to implement Capacity development for Disaster Risk Reduction

1. Are there additional stakeholder groups that should be included in this Strategy?

- Bilateral collaborations between countries to ensure of transboundary DRR capacity development (to be added to the tasks of governments & regional organizations including IGOs)
- Special groups such as indigenous, youth, migrant, disability groups (and other special groups listed in the Sendai Framework) should be spelled out clearer → potentially reflected in the NGOs & CSOs section
- Academia → Academia & Research Institutions
- Address UN, International Organizations and International Financial Institutions separately
 - UN → address the role of convening and coordination across different stakeholders
 - Donors including International, Regional and National Financial Institutions
 - International Organizations → International Organizations and Networks
- Media should be added (key roles = awareness raising & making DRR easy to understand)

2. Are there any additional tasks:

- Regional Organizations including IGOs → Regional Organizations and Networks
 - North-South cooperation
- Local and Sub-national Government
 - Collaboration and coordination among cities

Break Out Session 4: Group No. 6

Identifying Partners to implement Capacity development for Disaster Risk Reduction

1. Are there additional stakeholder groups that should be included in this Strategy?
2. Are there any additional tasks?

8. The United Nations, International Organizations, and International Financial Institutions

- Underpinning principles: The UN and international organizations need to play **supporting and brokering role** to :
 - **ensure a stronger coordination** and support to Member States, at their request
 - **avoid duplication** and build upon existing programmes and institutions
- In addition to a global list of partner types and role, a first step should be a **stakeholder analysis at country/regional level** to establish the key partners and stakeholders (or build from what exists)
- UN can recognize and support **accreditation of programmes**; IFIs can provide **scholarship**
- UN can **partner with Regional Organizations** to provide guidance on standards of terminology and global tools (e.g. Sendai Framework Monitor)
- Some objection to ‘standardizing training material’: Suggestion to **standardize learning outcomes**, while materials need to be contextualized
- Recognize, support and promote **capacitating and use of national/local institutions** for continuity of training, and academic programmes (e.g. for research, documentation)
- Maintain a ‘**roster**’ of experts as trained trainers available facilitate learning in regions and countries
- Focus on **training of trainers**: e.g. to ensure DRM is included in schools, educators and trainers
- Support should give priority to land-use planning, GIS and mapping
