

Learning Labs @ GP 2019

Sendai Framework Monitoring (Application of custom targets & indicators)

1. Purpose & Objectives:

The session is aiming at peer learning and interactive discussion on “Custom Targets and Indicators” built in the online Sendai Framework Monitoring system (SFM),

Participants are invited to share their experiences or expectations on usability of Custom Targets and Indicators. Peer-to-Peer discussion and learning will facilitate exploring how this tool will contribute to DRR policy making and follow-ups as well as developing and monitoring DRR strategies.

2. Target participants:

Current and prospective users of SFM such as national government officials and staff in regional organizations.

(Priority will be given to National Sendai Framework Focal Points)

3. Methodology and Content:

- Quick walk-through of the Custom Target and Indicator module *including concepts and defining targets and indicators* (presented by UNISDR and participants: 15 minutes)
- Discussion on application (e.g. to inform and monitor DRR strategies) (facilitated by UNISDR: 40 minutes)
- Wrap-up

4. Logistics and Resources:

Participants are required to bring their own laptop.

Tables should be equipped with electric sockets.

Need a projector/screen connected with laptop

Accounts (user-password) for the training server are required.

Additional support from SFM Officers is desirable (identify key participants and application).

5. Preferred time slots:

Lunch time (not overlap with other SFM/DI sessions)
