SEDAI FRAMEWORK VOLUNTARY COMMITMENTS ONLINE PLATFORM

Disaster risk reduction requires all-of-society engagement

The 2015 World Conference on Disaster Risk Reduction in Sendai, Japan, noted the shared responsibility of stakeholders for disaster risk reduction. The Sendai Framework for Disaster Risk Reduction 2015 – 2030 recognizes that all stakeholders and partners must work together for a resilient future.

Share your commitments in building resilience against disasters!

The Sendai Framework Voluntary Commitments online platform was established to mobilize, monitor and take stock of voluntary commitments made by different stakeholders towards the implementation of the Sendai Framework. Only individuals representing institutional entities can submit voluntary commitments.

Stakeholders will need to go through five steps of the voluntary commitment lifecycle and will also get a chance to be highlighted for their efforts in disaster risk reduction.

Support will be provided throughout the process by the SFVC team.
