NEW APPROACHES FOR DISASTER RISK FINANCE
INNOVATION PLATFORM at the 2019 Global Platform

Overview

Well-designed Disaster Risk Finance (DRF) strategies help to ensure that governments, businesses, society as well as humanitarian organisations have the necessary resources to better anticipate and manage the adverse consequences of climate-related disasters at the time and scale needed.

Approach

Various organisations and initiatives came together in a collective effort to showcase DRF approaches in their respective fields. We intend to inspire ambitious thinking and action needed to manage climate change risks by giving demonstrations of working tools and platforms as well as live events and experts talks.

Get involved, share experiences and contribute to the ongoing debate of the role of Disaster Risk Finance!

What?
New approaches for Disaster Risk Finance at the Innovation Platform
