

Improved Earthquake Risk Management for Governments

Sunday 19 May 13.00-15.00 @Global Platform on DRR, Geneva (room15)

What are your needs for earthquake risk assessment?

How can the Global Earthquake Model (GEM) support DRR in your area?

How can we collaborate best for more informed decision-making on earthquake risk?

GEM is a global collaborative effort to leverage earthquake science for the benefit of society. We are already working with governmental agencies and donor agencies from around the globe to make sure our joint efforts lead to tangible tools for decision-making worldwide.

If you are interested in risk assessment, public-private partnerships, capacity building, socio-economic vulnerability, open and transparent information... come to this session to get a taste of the OpenQuake platform and other GEM products being collaboratively developed. Participate in the discussion on how GEM can best help you to manage earthquake risk, and how you can become a partner in this global effort.

Send an email to nicole.keller@globalquakemodel.org so we can save you a seat.

Session Agenda:

Introducing GEM

Vision, membership, OpenQuake tools, resources and much more

GEM collaborations and partnerships

How does GEM operate? How can you become involved?

Open Discussion

What are your earthquake risk management needs? What would you like to see in GEM?

with..

John Schneider (Vice-Chair, Governing Board)

Christopher Burton (Socio-Economic Vulnerability)

Nicole Keller (Communications & Int. Relations)
