GOBIERNO DE LA CIUDAD DE SANTA FE

SANTA FE

"To develop, as a state policy, the integrated management of risk reduction, in order to incorporate this approach in the urban planning and promoting the construction of a prevention culture"

Development Plan Santa Fe City - 2008

HYOGO ACTION FRAMEWORK

- 1. To ensure that disaster risk reduction is a priority with a strong institutional basis for implementation.
- 2. To identify, assess and monitor disaster risks and enhance early warning.
- 3. To use knowledge, innovation and education to build a culture of safety and resilience.
- 4. To reduce the underlying risk factors.
- 5. To strengthen disaster preparedness for effective response.

1. Risk reduction as a local priority

 Creation of the Direction of Risk Management, which integrates the Municipal Cabinet and reports directly to the Mayor.

 Transversal management with all the other Secretaries of the Municipal Government.

 Creation of the Municipal System for Risk Management through the Ordinance Nº 11.512, replacing the Civil Defence concept.

 Progress in the conformation of the Municipal Committee for Risk Management, with the contribution and support of the UNL

5. Strengthening disaster preparedness for effective response

Final Conclussions...

SANTA FE

- About Risk Management, the priority is to set an excellent convergence and a common way of working.
- Cities must strengthen their governments, as well as participate in all decisions that affect local people.
- The transformations occur in a middle and a long time. They need the sustainability of the process and they can't depend on an individual actor or sector.
- It needs the convergence and the strengthening of the links, but about all, it needs an specific area that coordinates the all action with an integral vision.

¡Thank you very much!
