

Capacity for Disaster Reduction Initiative

CADRI (UNDP, UNISDR, OCHA)

Main Objective:

To advance knowledge and practice for the development of sustainable disaster risk reduction capacities.

Target Group

The ISDR system

- Governments
- All institutions involved in DRR at Global, regional and national levels.

The United Nations Country Teams

Capacity challenges at National level

- DRR is still perceived as disaster response
- Weaknesses in DRR strategic planning/programming
- Challenges in Mainstreaming DRR into planning
- Challenges in capacities for preparedness and recovery
- Regional organisations capacities need to be enhanced to support their member states.

CADRI services

- 1. Capacity Development Advisory Services**
- 2. Tools development , materials adaptation**
- 3. Training and facilitation services**
- 4. Knowledge exchange and networking**

CADRI modules

DRR Overview

DRR for Local Governments (urban risk)

DRR Mainstreaming

Risk Assessment

Recovery (incl. PDNA)

Preparedness

Climate Risk Management

DRR and Environment

DRR and Ecosystems

DMTP (21 modules),
